

I understand how the digital dashboard works. Thank you for offering this workshop.

organized and personable - altogether a most effective teacher
engaging

interested in our work

creating a chart or looking up values using different files.

and my experience was great. I would be better equipped had I came on time. Rich was very helpful as well as the two facilitators on site (many thanks to them

I would be interested in taking it.

and I learned a lot from the instructor. Thank you!

that it interrupts my concentration when I am learning. Once the self-paced activity begins

and will be using the tools I learned in my current role. I enjoyed the format very much

many thanks for offering this workshop online. Online is my only option at present

I couldn't finish the activity at time

also a student

and a great pace. So awesome that he was there to help us out. Very well done!

a bit more human interaction for newbies and the shy/introverted

Matt! You mentioned that there would be an ""advanced"" workshop in the future. I don't see it listed this was great and I'm looking forward to the next NVIVO workshop."

and if there were additional follow-up sessions

Rich!

and the offer to meet for further help. Makes the library a better place to be!"
rather than stick to a rigid powerpoint presentation.

Rich

thanks Rich and Brittany!

why do I need the workshop?"

which was specifically called out during the SurveyMonkey workshop because the data is not stored in
understand

especially for someone who isn't tech savvy. Keep doing what you're doing! Have a good day!"

both for ArcGIS and QGIS!

d we were encouraged to reach out if we need additional support.
